

Software to Improve Healthcare Efficiency

NetFax

PRODUCT BRIEF

Integrated replacement for dedicated fax appliances

Healthcare professionals need access to information stored in their healthcare information system. The required reports can be conveniently delivered via fax, a tried and true method. To simplify the setup and usability of faxing reports to doctors, nurses and other healthcare professionals, the NetSolutions network faxing products give you cost-effective options.

NetFax is designed to replace dedicated fax appliances. NetFax runs on a Windows PC and is defined in MEDITECH as a "Communications Director" printer. NetFax seamlessly integrates into your existing MAGIC system, allowing you to direct faxes to users defined within MEDITECH. Expansion is as simple as adding multiple modems. Logs are maintained on the server and communicated directly to the MEDITECH audit trail. Errors can be printed directly to a console printer for follow-up. NetFax can be upgraded to NetDelivery.

FEATURES AND BENEFITS

- Approved and supported by MEDITECH for guaranteed future compatibility
- Defined in MEDITECH as a "Communications Director" printer, seamlessly integrating with your information system for directing faxes to defined users
- Runs under Windows Server 2008 and 2003 for easy installation and setup
- Easy to add modems for flexible expansion when you need it
- Maintains logs on the server for directing errors to a system administrator and to the MEDITECH audit trail

PRODUCT INFORMATION

- Runs as a service under Windows Server 2008 and 2003
- Supports PERLE and MultiTech ISI modems
- Full integration with MEDITECH MIS and Telecom routines
- Supports full PCL5e emulation
- Logs all activity to the Windows Event Viewer and MEDITECH MIS routines
- Supports TCP/IP protocol to eliminate RS232 cabling issues

NetSolutions

"One very important application for us is delivering the lab results to the appropriate physician who ordered the tests. The referral lab that runs the tests has their equipment connected to the MEDITECH system which can read the bar code on the specimens. The test data is then delivered directly into MEDITECH and then the reports are immediately faxed to the requesting physician. The turnaround time is very fast, and the patient is given the appropriate treatment in a very timely manner."
