

Software to Improve Healthcare Efficiency

NetFax CS and 6.0

PRODUCT BRIEF

Integrated replacement for dedicated fax appliances

Healthcare professionals need access to information stored in their healthcare information system. The required reports can be conveniently delivered via fax, a tried and true method. To simplify the setup and usability of faxing reports to doctors, nurses and other healthcare professionals, the NetSolutions network faxing products give you cost-effective options.

NetFax is designed to replace dedicated fax appliances. **NetFax CS and 6.0** combines the capabilities of NetFax, Distribution Wizard and Desktop Fax into one integrated product. NetFax CS and 6.0 seamlessly integrates into your existing MEDITECH C/S or MEDITECH 6.0 system to enable you to direct faxes to users defined within MEDITECH. Expansion is as simple as adding multiple modems. Logs are maintained on the server and communicated directly to the MEDITECH audit trail. Errors can be printed directly to a console printer for follow-up. NetFax can be upgraded to NetDelivery.

FEATURES AND BENEFITS

- Approved and supported by MEDITECH for guaranteed future compatibility
- Defined in MEDITECH as a printer, seamlessly integrating with your information system for directing faxes to defined users
- Runs under Windows Server 2008 and 2003 for easy installation and set-up
- Easy to add modems for flexible expansion when you need it
- Maintains logs on the server for directing errors to a system administrator and to the MEDITECH audit trail

PRODUCT INFORMATION

- Runs as a service under Windows Server 2008 and 2003
- Minimum requirements are a current processor with a minimum of 2GB of free memory
- Supports PERLE and MultiTech ISI modems, and (optional) virtual modems
- Full integration with MEDITECH MIS and Telecom routines
- Supports full PCL5e emulation
- Logs all activity to the Windows Event Viewer and MEDITECH MIS routines
- Supports TCP/IP protocol to eliminate RS232 cabling issues

NetFax

"We send probably hundreds of faxes a day from our lab and radiology department and we're able to send them five times faster than we could with our old FAXBOX and FAXBOX 2. It seemed that every other day the FAXBOX would give us connectivity problems that would require restarting the process and spooling the jobs all over again. But NetFax EM4 works extremely well by comparison. Installation is simple, there's no learning curve to speak of, and it was half the price of FAXBOX."

Dennis Bosley, Manager of Networking and Telecommunications Upper Chesapeake Health Inc.

The Only Certified Report Distribution Product

NetFax CS & 6.0 is the only faxing solution to achieved Modular EHR Meaningful Use certification from the ONC-ATCBs (Office of the National Coordinator for Health IT - Authorized Testing and Certification Bodies) for ambulatory and in-patient practices.

Now hospitals can add Interbit Data's certified faxing solution to their MEDITECH Meaningful Use certified, HCIS-compliant solution and be confident they are fully qualified to receive ARRA stimulus funds.
